Toppan Niigata Plant Receives GOLD STATUS in RBA Audit

Toppan Inc. (Head Office : Bunkyo-Ku, Tokyo, Hideharu Maro President & Representative Director; hereafter Toppan) has acquired GOLD STATUS for the VAP (Validated Assessment Program) Audit with RBA (Responsible Business Alliance) at the Niigata Plant which produces FC-BGA Substrates and Color Filters for Displays.

The RBA is a global CSR promotion organization focused on the electronics industry that aims to help its member companies fulfill their social responsibilities through the establishment of sustainable supply chains, and has established a code of conduct to ensure that working environments are safe, workers are treated with respect and dignity, and business activities are conducted ethically and responsibly with respect to environmental impacts, where the VAP audit is a system in which a third-party auditing organization evaluates whether management is being conducted properly in accordance with these standards.

Niigata Plant is committed to continuous improvement of its supply chain as a production site for cutting-edge Electronics Products for the global market. As a result, we received GOLD STATUS for proper management in the audited areas of labor, safety, environment, ethics, and management systems, demonstrating our high level of commitment to our customers' requests for compliance with the RBA Code of Conduct.

Our company will continue to integrate the SDGs into our business activities and contribute to the realization of a sustainable future society to fulfill our social responsibility and mission in response to the expectations and trust of our stakeholders, with the aim of maximizing our corporate and social value.
